## 2020 Annual Fugitive Dust Control Report

This annual fugitive dust control report has been developed to describe the actions taken by plant personnel or contractors to control CCR fugitive dust, a record of citizen complaints and a summary of any corrective actions taken. As of April 2020, the facility has been taken control by Bierlein Companies Inc. (Bierlein) who is a demolition company in charge of demolishing the plant. Bierlein routinely sprays water in areas where loose, dry CCR material is present by means of water trucks, mist machines and/or fire hosing.

### Citizen Complaints

There was one citizen complaint in 2020 from a boater in an adjacent marina to the property.

### Corrective Actions

Grand Haven Board of Light & Power personnel investigated the situation by examining the complainant's boat and comparing it to surrounding boats within the marina and other marina's in the area. The material did not appear to be CCR. There were no other complaints from area boaters during the year.

This report was developed by personnel at Grand Haven Board of Light & Power in accordance with CCR regulations codified in 40 CFR part 257, subpart D.
